

# STAIRS & DURA CARPET CUSHIONS

The carpeting on stairs take more abuse than regular rooms and it often wears out much earlier making a carpet cushion an essential part of your stair runner or carpet installation. Protect your carpet by using Protector 5mm or Duracushion 6mm.

## Features and benefits

- The carpet lasts longer
- Pile face protected from matting or damage
- Ensures a luxurious feel
- Ease of maintenance
- Acoustical properties more than doubles

## Installation guidelines

- Install carpet cushion black side down
- Measure and cut the cushion to the width of the carpet runner minus approximately  $\frac{1}{4}$ " –  $\frac{1}{2}$ "
- Cut cushion for each stair tread to fit the tread including the nosing
- Stretch in place and staple cushion
- Do not install cushion on the riser
- Always follow carpet manufacturer's recommendations
